

AIRPORT MEMO

To: Chester County Area Airport Authority (CCAAA) Members

From: Gary L. Hudson, Airport Manager

Date: November 25th, 2014

Subject: Airport Hot Topics

For your review, below is a listing of issues affecting the Chester County/G.O. Carlson Airport (MQS).

NEW BUSINESS

- * **Building Secured:** On November 3rd, the fence surrounding the storage shed on the South side of the airport, has been repaired and secured. This building will be used to house the airport's summer equipment for the winter.
- * **Roof Repaired:** On November 3rd, the room and wall inside the barrel roof barn, located on the South side of the airport, were repaired. This building will be used to house the airport's vehicle trailer and small dump truck, for the winter.
- * **Light Bulb Replaced:** On November 4th, the light bulb was replaced on the airport rotating beacon.
- * **Absorbent Booms Installed:** On November 5th, absorbent booms were installed on the top of the terminal building, in order to prevent grease generated from the restaurant exhaust vent, from getting on the newly installed roof material.
- * **Doors Painted:** On November 10th, the wall panels on T-Hangars A, C, D and F were painted.
- * **Snow Blower Repaired:** On November 18th, a new fuel pump was installed on the snow blower.
- * **Deer Repellers:** On November 19th, deer repellers were set up on the South side of the airport, to try and prevent deer from coming near and/or accessing the runway. This has become a problem due to deer being more active and aggressive because of the deer mating season, which runs October thru the end of November.
- * **Hold Short Sign:** On November 25th, a light bulb was replaced on the Runway 29 Hold Short sign.
- * **Terminal Building HVAC Units:** On November 25th, a representative from Brubaker, Inc. Performed Preventive Maintenance on the Terminal Building HVAC units.

OLD BUSINESS

- * **Storm Water Drain Project:** This project has stopped and will start up again next spring.
