

AIRPORT MEMO

To: Chester County Area Airport Authority (CCAAA) Members

From: Gary L. Hudson, Airport Manager

Date: October 27th, 2016

Subject: Airport Hot Topics (November)

For your review, below is a listing of issues affecting the Chester County/G.O. Carlson Airport (MQS).

NEW BUSINESS

Pavements Cleaned: On 10/1/16 – 10/4/16, 10/5/16 and 10/11/16, the South apron vehicle parking lot, South apron road, which connects the vehicle parking lot to the South apron, and the farm house road, were respectively cleaned with our floor sweeper. Due to these pavements being made of a porous material, these pavements are required to be cleaned twice a year.

Scrap Removed: On 10/13/16, a large portion of scrap metal piled near the tree line opposite the maintenance garage, were picked up and removed off of MQS property.

Light Repaired: On 10/20/16, the internal components and light bulb were replaced on the aircraft apron light adjacent to Hangar 5B.

Airfield Sign Repaired: On 10/21/16, a light bulb was replaced on the Taxiway Alpha Directional Sign, which is located at the West end of the airport.

Sapling Removed: On 10/24/16, a broken off tree sapling located at the intersection of Aviation Way and Lindbergh Boulevard, was cut from its tree, and removed from that location.

Authority Security Room: On 10/26/16, the lock on the Security Room door was replaced.

OLD BUSINESS

Airport Perimeter Fence Project: Fencing on the South side of the airport has been repaired, erected and/or replaced. Small holes along that fence line are now being sealed.
